		Site Description:				#B07MO1000 - 1827 the Arsenal was established to replace the arsenal & quartermaster post of Belle Fontaine. Duty was to supply government outpost in the watershed of the Missouri & Mississippi Rivers. Within twelve years, this property had 22 buildings within a stone wall enclosure. The work consisted of assembling, storing and issuing small arms, artillery, gun carriages, ammunition, gunpowder, and a host of accutrements. St. Louis Arsenal (SLA) was not an "arsenal of manufacture"; it assembled them from parts made at the other US mrmories, ... contracted for cannonballs and artillry tubes from civilian foundries. But the SLA workforce manufactured nearly all types of ammunition and built gun cattages, traveling forges and caissons from scratch. The arsenal also ran a bustling business in pyrotechnics and was said to creat some of the finest fireworks displays in the country.
